

## Don't Forget the Census

We are doing well with the census but the government [census site](#) shows things are leveling off. The state is at 60.6% while Franklin is at 64.5%. Most were sent in via internet (60.8% of the total goal). Ten years ago, we reached 75.7%. A graph at the bottom of the [PDF](#) shows we are leveling off in our responses. I fear the final outcome will fall short. If census workers can't go door to door then towns that have more residents with internet access will have an advantage. If you haven't already, please fill out the census and send it in.
