

New people affected 6/16/2020

Each one is a person not a number

New cases in Franklin Township: 8

Total cases in Franklin Township: 1244

New fatalities reported in Franklin Township: 1

Total fatalities reported in Franklin Township: 125

Total number of LTC deaths: 61 (Martin and Edith Stein Assisted Living Residence)

4 month old

56 year old

96 year old

16 year old

94 year old

30 year old

96 year old

A 91 year old who passed away on 6/13

Franklin calculated values *

- Doubling time: ~ 1 year (this has dropped)
- R_7 : 1.7 Need to watch this. Could be an increase or small number effect.
- pseudo Recovered: 1013
- Pending Recovery: 106
- 84% of deaths (105 of 125) are 65 years or older.
- 36 consecutive days with 10 or few new cases

NJ Hospitalizations % of peak $(1291/8293) = 16\%$

We had a sudden increase to 8 but only for one day. The rest of the county was zero for the day. I will not conjecture why this occurred but one day is only one day. Let's not jump to conclusions.

* Definitions

Doubling time: The amount of time it would take to double the number of current cases at the current rate of growth. The higher the better

R_7 : The number of people an infected person would infect. Calculate by the sum of the new cases over the last 7 days divided by the number of new cases over the previous 7 days. The lower the better. Under 1 is good.

Pseudo recovered: The number of people who were infected 30 or more days ago who haven't died.

Pending recovered: the number of people infected in the last 29 days who haven't died. (total cases – deaths – pseudo recovered)

My typical disclaimers and sources

I do not answer questions about location of the positives. I do not have that information. For the reasons why please see my post on March 31

<http://mayorkramer.com/files/mar31.html#4>

Please see the Somerset Co. status map.

<https://www.co.somerset.nj.us/government/public-health-safety/health-department/services/disease-prevention/covid-19-status-map>

We have gotten more specificity on why the Twp.'s count of the number of total cases for Franklin differs from the county cases on their map. If an infected person who lives in Franklin moves to a care facility out of Franklin, then the county does not include them in the total number. We do. If someone who lives in another town becomes infected and then comes to Franklin, we do not count them. The county does.
