New people affected 6/19/2020
Each one is a person not a number

First the number new numbers, then the explanation.

New cases in Franklin Township: 7
Total cases in Franklin Township: 1267
New fatalities reported in Franklin Township: 0
Total fatalities reported in Franklin Township: 126
LTC fatalities reported in Franklin Township: 62

37 year old	70 year old	96 year old
54 year old	80 year old	
70 year old	88 year old	

There was a delay getting us some numbers. That is the cause of our recent increase. I'll do my best to clear up the confusion. I'll go into a little detail so when I look back, I'll get it straight.

First of all, the totals (1267 and 126) are correct as best I can tell. The dates of new cases however have been mixed up. Here are the corrections by dates.
6/16 we got 8, it should have been 3. 5 should have been reported earlier.
6/17 we got 9, it should have been 3. 6 should have been reported earlier.
6/18 we got 7, it should have been 3. 4 should have been reported earlier.
6/19 we got 7, it should have been 1. 6 should have been reported earlier.

Here it is in more detail.

16-Jun		17-Jun		18-Jun		19-Jun
8 Cases Reported		9 Cases Reported		7 Cases Reported		8 Cases Reported
Collection Dates:		Collection Dates:		Collection Dates:		Collection Dates:
5/14- 56 year old		5/19 - 74 year old		5/19 - 87 year old		5/25 - 70 year old
5/21 - 96 year old		5/19 - 80 year old		5/21 - 46 year old		5/25 - 96 year old
5/21 - 96 year old		5/19 - 86 year old		5/21 - 95 year old		5/25 - 80 year old
5/23 - 94 year old		5/19 - 87 year old		5/27 - 74 year old		5/25 - 70 year old
6/05 - 89 year old		5/19 - 90 year old		6/12 - 36 year old		5/25 - 88 year old
6/12- 30 year old		5/29 - 57 year old		6/15 - 30 year old		5/26 - 37 year old
6/13 -16 year old		6/08 - 59 year old		6/17 - 52 year old		6/15- 54 year old
6/14 - 4 months old		6/13 - 61 year old				
		6/16 - 87 year old				

The yellow highlighted cases are reported greater than 10 days after the specimen was collected. I consider that late. For the purposes of doubling time and R_7 I have put them in my database as if they were reported to us 5 days after collection.

Of the 32 cases (6/15 – 6/19) 17 are LTC, that is because they have been doing extensive testing at the LTC. Only 2 of these have been reported on the https://www.nj.gov/health/cd/topics/covid2019_dashboard.shtml web site as best I can tell. Very frustrating.

I hope that clears things up. Sorry for the mix-up but I can only report what I get. When It doesn't seem right, I investigate.

Bottom line, for now no spike. Phew.

My typical disclaimers and sources

I do not answer questions about location of the positives (except LTC). I do not have that information (except LTC). For the reasons why please see my post on March 31 http://mayorkramer.com/files/mar31.html#4

Please see the Somerset Co. status map.
https://www.co.somerset.nj.us/government/public-health-safety/health-department/services/disease-prevention/covid-19-status-map

We have gotten more specificity on why the Twp.'s count of the number of total cases for Franklin differs from the county cases on their map. If an infected person who lives in Franklin moves to a care facility out of Franklin, then the county does not include them in the total number. We do. If someone who lives in another town becomes infected and then comes to Franklin, we do not count them. The county does.

The State dashboard can be found at https://www.nj.gov/health/cd/topics/covid2019_dashboard.shtml
