Reasons for hope

- 1) It's 35 days since we had a COVID death in Franklin.
- 2) The vaccine is here and YES, I will receive the vaccine when I'm offer it.
- 3) Look at the hospitalization curve. There is a *hint* of it leveling off even though we (NJ) will likely have more cases this month than the April peak.

Keep up the hard work you are doing. This could all turn around very quickly if we let our guard down.
