

Are you open for business? Let us know!

Somerset County GIS has developed an **Open for Business Web Map** to connect important information to residents regarding the reopening status of local businesses during the evolving COVID-19 pandemic. Somerset County business owners can provide information about their availability and services by filling out a simple online survey by accessing the **Open for Business** website and clicking on the 'Business Survey' Tab to fill out the survey and be included on the map. They can also access the survey directly with this link: <https://arcg.is/9WurX>.

This Web Map will help in promoting and supporting various businesses during these difficult times. Since the data is crowd-sourced directly from the businesses this is an efficient way for residents to browse pertinent details regarding the status of Somerset County businesses. Lastly, as restrictions continue to ease, businesses can submit updates to reflect changes in their services. After submission of the survey and subsequent verification, the information populates on the map where residents can locate and view the business information.

If you have any questions about this effort, please email mdefreest@scbp.org
