WV	4%	6	
WY	60%	7	Small numbers, erratic test reports

The 14-day quarantine travel advisory applies to travel from certain states identified as those that have a positive COVID-19 test rate higher than 10 per 100,000 residents *or* have a 10% or higher positivity rate over a seven-day rolling average ("impacted states.")

A full explanation is [here](#).

Above is a table of the calculations for all 50 states plus DC. State abbreviation in red are currently on the quarantine list.

See my [comments](#) from 7/18

In the prior version I mistakenly put MN in red and MS in black
